HARD SURFACES / 材料保养

**Laminate Flooring**

A few moments of care and a little common sense can go a long way in keeping your new floors looking their best.

**Routine Maintenance:**

- Use a damp cloth to blot up spills as soon as they happen as excess water can damage the surface and seep into the seams of the flooring.
- Sweep, dust or vacuum the floor regularly (once or twice a week). Use a broom with soft bristles and/or a vacuum with the hardwood attachment only.
- Periodically clean the floor with cleaning products made specifically for laminate/wood floor care.
- DO NOT wash or wet mop the floor with soap, water, oil-soap, detergent, or any other liquid cleaning material. This could cause swelling, warping, delamination, and joint-line separation, and void the warranty.
- Do not use steel wool, abrasive cleaners, or strong ammoniated or chlorinated type cleaners.
- Do not use any type of buffing or polishing machine.

**Environmental Protection:**

- Entry mats will help collect the dirt, sand, grit and other substances that might otherwise be tracked onto your floor.
- To prevent slippage of area rugs, use an approved vinyl rug underlayment.
- Use floor protectors and wide-load bearing leg bases/rollers to minimize the chance of indentations and scratches from heavy objects.
- Remember, preferable temperature should be approximately 17-23°C (62-73°F with a relative humidity of 54-60%. Humidity should never be allowed to drop below 30% as this may cause gapping.
- Keep your pet's nails trimmed to prevent them from scratching your floor

**Porcelain Tile**

Mop with water and a PH neutral cleaner and allow to dry. Always wipe up spills immediately to prevent staining of the grout.

NOTE: It is the homeowner's responsibility to re-seal the grout with a certified grout sealant. This should be done on an annual basis. You can purchase a grout sealer from your local home improvement store.

**Engineered Quartz Counters**

Quartz countertops are composed of ground quartz stone, pigments, and resin. They are naturally glossy and should not require polishing.

In order to care for your quartz countertops, use non-abrasive cleaners for cleaning. Avoid hard pressure and quick changes in temperature. Do not use metal utensils to remove stuck on material.

**Refer to Homeowner's Manual for care and maintenance information**
